

ANUGANTI VIJAY KUMAR

+91 8341121870 vijayanuganti504@gmail.com Hyderabad, Telangana

PROFESSIONAL SUMMARY

Aspiring web developer with solid foundation in HTML, CSS, Python, Dash, JavaScript, SQL, and Java. Experienced in building responsive web applications using modern technologies like React.js and Bootstrap. Proficient in version control with GitHub and database management with MySQL and Oracle SQL. Eager to contribute to innovative projects while continuously improving full-stack development skills in a growth-oriented team environment.

EDUCATION

CMR Institute of Technology <i>Bachelor of Technology in Computer Science and Engineering; CGPA: 7.19/10</i>	Hyderabad, Telangana 2020 – 2024
Narayana Junior College <i>Intermediate (MPC); Marks: 927/1000</i>	Hyderabad, Telangana 2018 – 2020
Gowtham Model School <i>Secondary School (SSC); CGPA: 9.3/10</i>	Koratla, Telangana 2017 – 2018

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript, React.js, Bootstrap, React-Bootstrap
- **Backend/Databases:** Java, Python, Dash, SQL, MySQL, Oracle SQL, REST API Integration
- **Tools & Platforms:** Git, GitHub, Microsoft Office Suite (Excel, PowerPoint, Word)
- **Interests:** Web Development, Chess, Puzzle Solving

WORK EXPERIENCE

Web Development Intern <i>Unified Mentor</i>	Hyderabad, Telangana April 2025 – June 2025
– Developed a web-based weather application enabling users to retrieve current weather conditions by location – Implemented features displaying temperature, weather description, and representative weather icons – Built responsive front-end interface using HTML, CSS, and JavaScript with focus on user experience – Integrated with weather API to fetch real-time data and ensure accurate weather information display	

PROJECTS

- **Portfolio Website** | *HTML, CSS, JavaScript, Git*
 - Designed and developed fully responsive personal portfolio website showcasing technical skills and projects
 - Implemented cross-browser compatibility and mobile-first responsive design principles
 - Integrated Git for version control and deployed the site for public accessibility
 - Featured academic background, certifications, and detailed project descriptions with interactive elements
- **Cab Fare Calculator** | *React.js, JavaScript, CSS*
 - Built fully functional cab fare calculator using React.js with dynamic fare calculation based on multiple parameters
 - Implemented user input forms calculating fares based on distance, cab type, and additional surcharges
 - Utilized React hooks and state management for real-time fare updates and smooth UI transitions
 - Tested application across various scenarios to ensure accuracy, performance, and responsive design
- **Weather Application** | *HTML, CSS, JavaScript, API Integration*
 - Developed interactive weather application fetching real-time weather data from external API
 - Designed intuitive user interface allowing location-based weather condition retrieval
 - Implemented dynamic display of temperature, weather descriptions, and corresponding weather icons
 - Ensured responsive design and optimized performance for seamless user experience across devices

AWARDS & LEADERSHIP

- Participated in Smart India Hackathon, collaborating on innovative technical solutions
- Represented college in technical vs. non-technical debate competition at CMRIT
